

Scrum Report 10/16

What have I worked on?

- Getting acquainted with the datasets and reading the documents linked in the project description.

What will I be working on next?

- Meeting with Transit Equity team 2 to answer: How can we split the work amongst us?
 - Have one group focus on ridership data (how often people get on and off the stops) and the other focus on geographic location (the income levels) potentially

Have I run into any issues? Do I need help?

- https://mbta-massdot.opendata.arcgis.com/datasets/mbta-bus-ridership-by-trip-season-stop?fbclid=IwAR2tYA2f9zK2HR6VZknP3Llcl4I7QgWkr1hodUfE8Vg_fNqlab_QRTrmxpo has a column named trip_start_time. It appears to be in 24 hour time, but there's entries that go past 24 (ex. 25:00:00), what does that mean? Where could we find documentation/more information about what each column means

Have I talked to the client recently? When are we meeting with them next?

- We have not been able to communicate with the client. The Spark! team is also aware of the situation.
