

Scrum report for the week of 10/18

What have we worked on?

- Spoke with Team 2 to divide up the work
- Tried running the code provided in the project description
- Looked through the available datasets
- Defined next steps

What will we be working on next?

- Grabbing the necessary census and tract data to complete step 2 of the project description's approach
- Researching how projects like this have been done in the past

Have we run into any issues? Do we need help?

- We don't understand the input "dataframe" in the `add_census_tract(dataframe)` function given in the project description

Have we talked to the client recently? When are we meeting with them next?

- We have not recently spoken with the client, but according to the PM, we could possibly be speaking with them next week.
