

Scrum report for the week of 11/16

What have we worked on?

- Completing work for Deliverable 2 as per the new population and 0.5-mile buffer suggestions given during our meeting with Spark

What will we be working on next?

- Further polishing Deliverable 2 (adding graphs and visualizations)

Have we run into any issues? Do we need help?

- Based on the feedback received during Spark meetings, we'll have to readjust our approach a bit, focusing on a different population other than ridership data. It will be detailed in the deliverable.

Have we talked to the client recently? When are we meeting with them next?

- We have not recently spoken with the client. We will reach out to Spark! to discuss this further.
