- **What have I worked on?**

We are still trying to finish up the script that turns the coordinates into images.

- **What will I be working on next?**

  Finishing up the image gathering script.

- **Have I run into any issues? Do I need help?**

  We tried to use google map to get the images but it violated Google's policy. We are thinking of other ways such as google Streetview API.

- **Have I talked to the client recently? When are we meeting with them next?**

  Yes, we meeting them next Friday.
