Scrum report for the week of 11/23

What have we worked on?
- Completed work for Deliverable 2 (making data more robust, creating visualizations)

What will we be working on next?
- Completing work for Deliverable 3 (improving visualizations, polishing the report)

Have we run into any issues? Do we need help?
- Tableau had a bit of a learning curve, but we have a much better understanding of it now
- We would love to get feedback on our deliverable from Spark! if possible

Have we talked to the client recently? When are we meeting with them next?
- We have not recently spoken with the client and are unsure if we'll be able to meet with them before the submission of the final deliverable. We will reach out to Spark! to discuss this further.
